INTRODUCTION

AI Engineer and MCA student specializing in **LLMs, computer vision, and full-stack development**. Currently building intelligent inventory management systems at **Mastek**.

WORK EXPERIENCE

AI Engineer Intern - Mastek

Aug 2024 — Present

- Developed an **AI-powered inventory management advisor agent** using LLMs and prompt engineering, optimizing stock level predictions and reducing inventory costs by **25%**.
- Implemented **advanced prompt engineering techniques** for ChatGPT
- Researched **LLM-as-Operating-System architectures** for autonomous agent workflows.

PROJECTS

Advanced Face Liveness (3 Step Verification) | [GitHub](#)

- Developed a **multi-modal biometric verification system** using computer vision, voice recognition, and gesture detection, reducing spoofing attempts by **95%**.
- Built **Flask REST API backend with OpenCV, dlib, MediaPipe for real-time face detection** with live camera streaming.
- Implemented **3-step verification process** with randomized challenges, achieving **92% accuracy** in human liveness detection.

Claude MCP Server | [GitHub](#)

- Built a **Model Context Protocol (MCP) server** with role-based authentication, reducing unauthorized access by **98%** through JWT tokens and SHA-256 password hashing.
- Implemented **Python-based supply chain management system** with inventory tracking, audit logging, with **RBAC**.
- Developed secure authentication decorators and **in-memory data management**, improving system response time by **85%** for real-time operations.

Multiple Disease Prediction System (Parkinson's, Heart Attack, Diabetes) | [GitHub](#)

- Deployed ML models with **Scikit-learn**, predicting Parkinson's, heart attack, and diabetes risks with up to **85%** test accuracy.
- Built a **real-time Streamlit** web app for user-driven risk prediction and clinical decision support.
- Secured patient data through robust **form validation** and controlled input handling.
- Delivered insights through **Matplotlib visualizations**, improving diagnostic confidence for clinicians.

AI-Powered Web Content Extraction Browser Extension

- Built a **JavaScript browser extension** with intelligent DOM parsing that extracts visible/hidden web content, reducing manual data collection by **90%**.
- With **95% extraction accuracy**, enabling seamless content analysis and automated text processing workflows.

CERTIFICATIONS

- Oracle: OCI AI Foundations Associate, AI Agent Fusion Studio
- SAP: Certified ABAP Backend Developer
- Microsoft: Azure Data Fundamentals, MTA: Security Fundamentals
- Coursera: Software, Programming, DB and Git-GitHub
- Cisco: Operating System
- DeepLearning.AI: ChatGpt Prompt Engineering, LLM as Operating System

SKILLS

Operating Systems	Linux (Ubuntu, CentOS, Red Hat), Windows
Programming Languages	Bash, Python, C++, Java, PHP, C#, JavaScript
Tools	Git, GitHub, ZenHub, Shell Scripting
Databases	MySQL, RDBMS, Oracle, MongoDB, NoSQL
Cloud & DevOps	AWS, Docker, CI/CD Pipelines, IAM
Other Skills	System Administration, Server Monitoring, Automation, Networking Concepts, Troubleshooting

EDUCATION

MCA, Charotar University of Science and Technology - Anand, **GPA: 8.6/10**

Jun 2024 — May 2026

B.Sc. CS (Bachelors in Computer Science), Mulund College Of Commerce - Mumbai, **Grade: A**

Jul 2021 — Jun 2024
